

## **ATTENTION ALL CONSTRUCTION WORKERS!**

*Your jobs and your livelihoods are being threatened by an organized effort to destroy merit based contracting. Everyone who works in construction, no matter what your job may be, needs to get involved and fight back against the forces that are trying to take the bread right out of our mouths. BuildingNYC has been formed to fight back and protect our ability to continue to work and feed our families---*

## **WE NEED ALL OF YOUR SUPPORT!**

### **What needs to be done:**

- (1) **Join:** Go to the [BuildingNYC](http://buildingnyc.org/) website and join with your employers and fellow workers in the organized effort to fight back. (<http://buildingnyc.org/>) BNYC is fighting for your right to work against the Old Guard of the industry that wants to protect its privileges. If they get their way there will be less work for all of us and many of our people will lose their ability to take care of their families;
- (2) **Worker Safety:** Too many workers have been hurt on the job and have even lost their lives because of lax oversight by the city-and poorly trained inspectors. BNYC's first priority after fighting to keep our work and our jobs will be to make all of the construction sites as safe as possible. We will be developing legislation and oversight reforms to make this happen.
- (3) **Training:** Learn at our website about the new training program being developed for your benefit. With training you will have more than a job, you'll have a career! BNYC is partnering with ABC the nation's top training company to establish a state of the art training program that will enable you to get the kind of training that will lead to higher pay and advancement to a better future for you and your family. This training will be free-paid for by your employers because it is in all of our interests to have workers with more skills. Our program will be better than any existing program and will make you the most skilled worker that you can be.  
(<http://www.abc.org/en-us/educationtraining/crafttrainingapprenticeship.aspx>)

### **What we want:**

- A right to work in an open and competitive market not controlled by the special interests.
- Less government restrictions that limit building so there will be more work for all.
- A safer job site / work environment.
- Career advancement with skills and safety training leading to better pay and job security.

**Sign up today! The job you save may be your own!**
